INTRODUCTION

My name is Nur Iffah Nadhirah Binti Azmi, a student of ITM23903: Photography, Techniques, and Technology. For this project, I aimed to highlight the elegance and cultural essence of the Baju Melayu. Through careful attention to composition, lighting, and storytelling, I present a series of photographs that celebrate the spirit of Eid Adha.

PROJECT DESCRIPTION

Titled "Tradition in Focus: Celebrating Eid Adha with Simplicity and Elegance," this project showcases the Baju Melayu in its classic form, styled with a sampin and songkok. The concept highlights the attire's significance in festive traditions while keeping the visuals clean and sophisticated.

THE BACKGROUND

Shot on Nikon D7500

50mm f/2 1/800sec ISO 50

Taman Awam Lagun Kuala Ibai is a public and recreational park located next to Masjid Tengku Tengah Zaharah (Masjid Terapung). The place was chosen because of its serene and peaceful ambiance in the morning, offering a perfect backdrop to capture the essence of Eid-ul Adha.

ORIGINAL PHOTO

Shot on Nikon D7500
50mm f/2 1/500sec ISO 50

CONCEPT

The concept revolves around celebrating Eid-ul Adha with a serene and elegant theme. The chosen location, Taman Awam Lagun Kuala Ibai near Masjid Tengku Tengah Zaharah, symbolizes peace and reflection, complementing the cultural and traditional significance of the Baju Melayu ensemble.

TECHNICAL DETAILS

APERTURE / DEPTH OF FIELD (DOF)

The photo was taken using an aperture of $f/2$, allowing for a shallow depth of field that isolates the subject from the background. This choice draws attention to the intricate details of the Baju Melayu, sampin, and songkok while providing a smooth, pleasing bokeh effect.

SHUTTER SPEED

A fast shutter speed of $1/500$ s was chosen to freeze any potential motion, ensuring the subject remains sharp and in focus. This setting is particularly effective for outdoor photography, where subtle movements caused by wind or shifting light conditions can affect image clarity.

ISO

An ISO setting of 50 was used to achieve a clean and noise-free image. This low ISO value ensures maximum detail retention and enhances the overall quality, making it ideal for capturing the rich textures of the attire and the serene background.

LIGHTING

Natural morning light was utilized to create a warm and inviting ambiance. The soft, diffused lighting highlights the textures of the fabric and adds a gentle glow to the scene, enhancing the overall atmosphere without harsh shadows.

STORYTELLING

The photo captures a moment of quiet elegance, with the model exuding confidence and pride in traditional attire. The serene location, combined with the dignified pose, conveys a story of cultural heritage and personal reflection during Eid-ul Adha.

COMPOSITION

The composition adheres to the rule of thirds, positioning the model slightly off-center to create visual interest. The background features the peaceful surroundings of Taman Awam Lagun Kuala Ibai, adding depth to the image while keeping the focus on the model and the attire.

ANOTHER ORIGINAL PHOTO

Shot on Nikon D7500

50mm f/2 1/500sec ISO 50

The photo tells a story of cultural pride and celebration. The dignified pose of the model, paired with the tranquil setting, reflects the essence of Eid-ul Adha as a moment of gratitude, tradition, and introspection.

EDITED PHOTO

EDITING

Adobe Photoshop was used for post-processing to enhance the image while maintaining its authenticity. Adjustments were made to brightness and contrast to highlight the details of the Baju Melayu and create a vibrant, polished look. Subtle color corrections were applied to ensure the tones appeared natural and cohesive with the serene setting.

Two final edited versions were created:

1. Without Text: A clean version showcasing the subject and setting without any added elements.
2. With Text: A version featuring the words "Eid Adha" to emphasize the festive theme and enhance the storytelling aspect of the image. The text was carefully placed to complement the composition without distracting from the subject.

BEHIND THE SCENE

CONCLUSION

This photography project beautifully captures the essence of Eid-ul Adha through a blend of cultural storytelling, technical expertise, and artistic vision. By showcasing the Baju Melayu, sampin, and songkok in a serene and meaningful setting, the photo emphasizes the elegance of tradition.

From the careful choice of settings such as the aperture of f/2, shutter speed of 1/500s, and ISO 50, to the thoughtful use of natural morning light and refined editing in Adobe Photoshop, every element was meticulously planned and executed. The peaceful backdrop of Taman Awam Lagun Kuala Ibai enhances the narrative, reflecting the tranquility and significance of the celebration.

This project not only highlights the cultural heritage of Eid-ul Adha but also serves as a testament to the power of photography in preserving tradition while engaging viewers through visual artistry.

SPECIAL THANKS TO

I would like to express my heartfelt gratitude to the following:

1. My Parents for their unwavering support, encouragement, and assistance throughout this project, for their constant love, motivation, and belief in me, which inspired me to give my best effort.
2. Sir Mohd Sufian bin Mat Deris – My ITM 23903 lecturer, for his guidance and valuable insights that shaped the success of this portfolio.

Your contributions and support have been invaluable, and I am truly grateful.
